

Estão abertas as inscrições para bolsas no programa P.R.I.M.E. para projetos de pós-doutorado na Alemanha (6 meses) combinado com um ano de pesquisa em outro país até o dia **16 de fevereiro de 2016**.

Almost 70% of all PhD students in the DAAD address program of all universities, who are not from current countries, but who still wish to spend some time researching abroad.

Thanks to the DAAD program for their research stay abroad for a 6 to 12 month independent part of a German university or research center. During the stay abroad the return to Germany can be especially promoted through the cooperation with the prospective host institution. In accordance with the "Language Charter for Researchers" the DAAD offers funding to German institutions of higher education for the employment of the fellowship holders, thus enabling the DAAD fellows to pursue their university courses throughout the whole funding period.

The P.R.I.M.E. website contains contacts of German universities who provide support to applicants in the identification of suitable research groups and the respective interests. If as a German researcher of high education you are interested in participating a research project in P.R.I.M.E., please write to prime@daad.de.

P.R.I.M.E.
Postdoctoral Research
International Mobility
Experience

Application deadline: 1 February 2016
Earliest fellowship start date: 1 September 2016

A Win-Win Situation...

- ... for jobsites
Positions can identify the home institution for their subsequent return to Germany even before the start of their stay abroad. Regular communication with the German host institutions helps to ensure the best possible preparation for the return to Germany.

DAAD information and guidance ensures best network building and provides valuable support in career planning.

- ... for German institutions of higher education
Higher education institutions gain access to an attractive instrument for financing research. The P.R.I.M.E. DAAD support offers a number of opportunities during which long to be funding possibilities and together with the fellowship holder, new research areas and international collaborations can be developed.
